## Training and Skill Development

- Pipeline Construction Management
- Geographic Information Systems
- Data Recovery
- Software Development

Experience A Brighter Tomorrow.....Today

## Unistal Education Program

### About Us

Unistal Education Program is running under the patronage of Unistal Systems Pvt. Ltd., a multinational company having offices in Mumbai, Noida, USA, Abu Dhabi, etc. and is headquartered at New Delhi. We are in the industry since 1994 and have been One of the World's Leading Organizations providing highly out of the box Data Recovery applications with a global footprint of 5,000,000 user licenses in more than 35 countries. We are pioneers in the field of Data Security, Geographic Information Systems and Oil & Gas sector. In the field of Data Security, Unistal provides products, solutions and services like Antivirus Software, Data Care products & solutions and Data Recovery software products & services. In Oil & Gas sector, Unistal provides solutions and services for Pipeline Construction Management, City Gas Distribution Network, Pipeline Integrity Management, etc. We have also the experience of developing Cloud based GIS application for Custom Engineering, 3D visualization, and distributed computing. We have completed more than 40 projects in pipeline construction management and geographic information systems covering more than 20,000 kms globally. Unistal also provides web solutions like Task Management System & Electronic Document Management solution for organizations. At present, Unistal has more than 50 software products which include Antivirus, Data Care, Data Recovery, Email Recovery & Conversion, Server Recovery and File Recovery.

### Skill Development Courses

With nation facing shortage of competent professionals at workplaces and majority of people being unemployed, there occurs a need of improving skill set of the people. Unistal having a vision of making the next generation **Saakshar**, **Saksham** and **Samridh**, have introduced few important courses in training program under skill development for people who want to achieve greater heights in their professional career.

### Training Courses

Unistal has designed the most sought after courses popular in the industry to make the next generation an expert in the core areas like **pipeline construction management**, **geographic information system**, **data recovery software programming and testing**. Knowing the importance of summer training and industrial training in the curriculum, Unistal announces **training** program for the students of BE/B.Tech., BCA/MCA or related courses. We tailor our training programs in such a way that enrich the students with practical know how and conceptual learning. Our training Program include live projects to work upon which would be preceded by an informative training on latest technologies. Training Program is been provided for **software development** (C++, PHP, Android and software testing), **data security & recovery** (data recovery), **mechanical** (pipeline construction management), **GIS** (GIS survey & GIS implementation). The training programs are offered for the students of Computer Science, Information Technology, Electronics & Communication and other related streams of diploma or engineering.

### Pipeline Construction Management

Unistal provides training in Pipeline construction management to bring the student up to date with the latest design and construction practices in Oil & Gas pipelines. The candidates will become ready to explore challenging situations at workplace as there will be more practical sessions and hands- on experience on live projects.

**Training duration:** 2 months including theory class, practical class and experience of working on live projects.

**Eligibility:** Degree or diploma in Mechanical/Civil Engineering (candidates pursuing the course may also apply).

### Geographic Information Systems (GIS)

The courses covered under geographic information systems training are **GIS survey** and **GIS implementation**.

### GIS Survey

The training program on GIS survey gives you on-field experience of Total Station, Auto Level and DGPS followed by project analysis using software mapping tools.

**Training duration:** 2 months including theory class, practical class and experience of working on live projects.

**Eligibility:** B.Tech. (Mechanical Engineering/Civil Engineering) or Draughting diploma or B.Sc. (in Geography/ Geology/ Geophysics/ Physics) or ITI/ 12th pass with relevant experience.

# Unistal Education Program

## GIS Implementation

With training in GIS implementation, you can examine and analyze geographic information at different levels on cartography, remote sensing, mapping, analysis, etc. Candidates will get opportunity to work on live projects and understand, learn, practice and apply skills of GIS implementation.

**Training duration:** 2 months including theory class, practical class and experience of working on live projects.

**Eligibility:** B.Sc. (in Geography/ Geology/ Geophysics/ Physics) or B.Tech. (Mechanical Engineering/ Civil Engineering) or Draughting diploma.

## Data Recovery

Unistal provides training in Data recovery to make you learn to recover crashed, deleted, damaged, and formatted multimedia files from any storage device. At the end of the training program you will be ready to either become a successful data recover specialist or you can start your own data recovery business.

**Training duration:** 2 months including theory class, practical class and experience of working on live projects.

**Eligibility:** students from BCA, MCA, BE, B.Tech., MBA, Polytechnic, ITI, Diploma in computers etc.

## Software Development

The courses covered in software development training are **C++ programming, PHP programming, android programming and software testing.**

**Training duration:** 2 months and 6 months. In both the durations, the first 2 weeks will be for theory classes and rest all for practical classes and for working on live projects.

**Eligibility:** Graduates or Undergraduates from Computer Science/ IT/ Electronics, etc. background or basic knowledge of any programming language.

## C++ Programming

Unistal provides training in C++ programming to introduce you to the technical skills not been taught in the educational institutes but are a must to be an industry professional. There will be more practical classes than theory classes. You will get the hands-on experience on live projects while grooming your programming skills.

## PHP Programming

Unistal provides training in PHP programming to not only brush up your programming skills but with this you also get an opportunity to work on live- projects and become ready for the industry. With PHP Training, you will be able to understand, learn, practice and apply technical skills of PHP, which is a highly popular and demanding language which has brought a revolution in the web development industry.

## Android Programming

Unistal provides training in Android to provide opportunity in programming in Android and will also take you through some advance concepts related to Android application development with hands-on experience on live projects. The candidates will be taken through the world of programming in android under the ample guidance of highly competent, experienced and much in demand industry experts.

## Software Testing

Unistal provides training in software testing to make you learn testing on different domains: Desktop Application Testing, Mobile Testing, Web Testing and Database Testing. You will get acquainted with prevailing Automation Testing Tools such as QTP, Selenium etc. You will understand the way the organizations work and become ready for the industry with hands- on experience on live projects. With training in software testing, you will be able to understand, learn, practice and apply technical skills of software testing.

## Highlights of the courses

- Become ready for the industry
- Improve your functional and technical skills
- Get trained by industry experts
- Learn while you work
- More practical and less theory

## Benefits of the courses

- 100% job assistance
- Complimentary soft skills training
- Get a letter of work and a certificate
- Groom yourself and stand out from the crowd

Let's join Unistal Education Program

How can I be ready to be placed in MNCs?

How can I improve my skill set?

How can I become industry ready?
